About me

Professional I am a final-year B.Tech Computer Science student at MEA Engineering College, Kerala, with strong experience in full-stack web and mobile app development. As an entrepreneur and full-time developer, I contribute to multiple startups while managing academic responsibilities. I've co-founded a digital solutions startup, worked with leading tech companies, and held leadership roles in technical societies. Skilled in modern front-end frameworks, Django-based back-end systems, and database management, I've delivered several commercial projects including e-commerce, event management, and AI-powered applications. Passionate about technology and mentorship, I serve as a Master Tutor at Steyp and Head Student Coordinator for my department, with deep interests in AI, cybersecurity, and emerging technologies.

Education

Bachelor of Technology in Computer Science

APJ Abdul Kalam Technological University (KTU), Kerala

MEA Engineering College, Malappuram

Expected Graduation: 2026

CGPA: 7.1/10.0

Professional Experience

Co-Founder | Kalkus

April 2025 – Present

Founded and currently operating a digital solutions startup focused on providing comprehensive planning-oriented services for businesses and organizations. Kalkus specializes in delivering end-to-end digital transformation solutions.

Key Responsibilities:

- Lead business strategy and client relationship management for digital solution projects
- Design and develop custom web platforms tailored to client requirements
- Provide comprehensive branding services including logo design, brand identity, and marketing materials
- Offer technical support and consultation services for businesses seeking digital transformation
- Manage project timelines, deliverables, and quality assurance processes
- Coordinate with team members and stakeholders to ensure successful project completion

Full-Time Web Developer | Zappq

March 2025 – October 2025 (7 months)

Worked as a dedicated full-time web developer for Zappq, a comprehensive doctor appointment booking application designed to streamline healthcare access.

Key Responsibilities:

- Developed and maintained the web platform for the doctor appointment booking system
- Implemented user authentication and authorization systems for patients and healthcare providers
- Created responsive interfaces for appointment scheduling, doctor search, and patient management
- Integrated payment gateways for consultation fees and booking services
- Developed admin dashboards for managing doctors, appointments, and platform analytics
- Optimized database queries and application performance for handling large user bases
- Collaborated with mobile app developers to ensure API consistency and functionality
- Implemented security measures to protect sensitive patient and medical data

Multiple Positions | TALROP/STEYP

November 2022 – Present

Progressed through multiple roles at TALROP/STEYP, demonstrating continuous growth and expanding responsibilities in web development, mobile development, AI, and education.

Full Stack Web Developer Intern (Django)

November 2022 – December 2023

- Developed full-stack web applications using Django framework and Python
- Created RESTful APIs for front-end and mobile application integration
- Implemented user authentication, session management, and role-based access control
- Designed and optimized database schemas using PostgreSQL
- Built responsive front-end interfaces using HTML, CSS, JavaScript, and Bootstrap
- Participated in code reviews and followed best practices for clean, maintainable code
- Deployed applications on cloud platforms and managed server configurations

App Developer Intern (React Native)

February 2024 – April 2024

- Developed cross-platform mobile applications using React Native framework
- Integrated Firebase services for authentication, real-time database, and cloud storage
- Implemented push notifications and real-time data synchronization features
- Created reusable component libraries for consistent UI/UX across applications
- Optimized application performance and reduced load times

- Conducted testing and debugging across iOS and Android platforms

GenAI Intern

Duration specified in experience

- Explored and implemented generative AI technologies in practical applications
- Integrated AI APIs for natural language processing and content generation
- Developed proof-of-concept applications demonstrating AI capabilities
- Researched emerging AI tools and frameworks for potential business applications

Master Tutor

Current Position

- Manage and mentor a team of students in coding and technology subjects
- Develop curriculum and learning materials for web development courses
- Conduct one-on-one and group tutoring sessions on programming fundamentals
- Guide students through project development from conception to deployment
- Evaluate student progress and provide constructive feedback
- Create engaging educational content to simplify complex technical concepts

Leadership & Organizational Experience

Head Coordinator | TACS (Technical Association of Computer Science)

May 2025 – Present

Currently serving as the Head Coordinator for TACS, the official society of the Computer Science Department at MEA Engineering College.

Responsibilities:

- Lead and coordinate all department activities, events, and initiatives
- Manage a team of student volunteers and committee members
- Organize technical workshops, hackathons, and guest lectures
- Facilitate collaboration between students, faculty, and industry professionals
- Plan and execute annual technical fests and departmental events
- Maintain communication channels and documentation for departmental activities

Design Lead | TACS

May 2024 – May 2025

- Led the design team responsible for all visual communications and branding
- Created promotional materials, posters, and digital content for events
- Designed social media graphics and maintained consistent brand identity
- Coordinated with other teams to ensure cohesive event presentations
- Mentored junior designers and conducted design workshops

IAS Vice Chairperson | IEEE MEA Student Branch

February 2025 – Present

Serve as Vice Chairperson of the Industry Applications Society (IAS) Chapter at IEEE MEA Student Branch.

Responsibilities:

- Manage and organize technical events, workshops, and seminars related to industry applications
- Coordinate with IEEE headquarters and other student branches for collaborative initiatives
- Invite industry experts and organize talks on emerging technologies
- Oversee chapter activities and ensure alignment with IEEE standards
- Lead team meetings and delegate responsibilities among chapter members
- Maintain chapter records and prepare activity reports

Web Master | IEEE MEA Student Branch

January 2024 – February 2025

- Developed and managed the official WordPress website for IEEE MEA Student Branch
- Maintained website content, ensuring up-to-date information on events and activities
- Implemented responsive design principles for mobile and desktop compatibility
- Managed website hosting, domain, and security configurations
- Created event registration systems and integrated payment gateways
- Monitored website analytics and optimized for better user engagement

Animator Intern | Gtech muLearn

May 2023 – December 2024

- Created educational animation content for technology learning platforms
- Developed explainer videos for complex technical concepts
- Utilized Blender and After Effects for 3D modeling and motion graphics
- Collaborated with content creators to produce engaging visual materials
- Contributed to community learning initiatives through multimedia content

Major Projects

AI-Powered Chatbot Web Application

Role: Lead Developer

Developed a sophisticated interactive chatbot web application using Django framework, integrated with Groq API for intelligent, NLP-driven conversational capabilities.

Key Features:

- Multilingual support enabling communication in multiple languages
- Voice-to-text and text-to-voice functionality for accessibility
- Secure user authentication system with profile management
- Conversation history tracking and storage for reference
- Export functionality allowing users to download chat histories
- Rich text response formatting for structured, readable interactions
- Bootstrap-based responsive design ensuring compatibility across devices
- Session management for maintaining conversation context

Technologies Used: Django, Python, Groq API, JavaScript, Bootstrap, HTML/CSS, SQLite/PostgreSQL
Future Enhancements:

- File upload capability for document analysis
- Automated conversation summaries using NLP
- Integration with additional AI models for specialized responses

College Event Management System

Role: Lead Developer

Designed and developed a comprehensive event management system specifically tailored for college technical and cultural programs.

Key Features:

- User authentication system with login/logout functionality
- Session-based access control for event booking
- Dynamic header and footer that adapt to user authentication status
- Event catalog with detailed descriptions, dates, and availability
- Responsive event booking interface built with Bootstrap
- Admin panel for event creation, modification, and participant management
- Automated email notifications for booking confirmations
- Reporting and analytics dashboard for event organizers

Technologies Used: PHP, MySQL, JavaScript, Bootstrap, HTML/CSS

Technical Highlights:

- Implemented secure session management to prevent unauthorized access
- Created intuitive user interface focused on ease of navigation
- Designed normalized database schema for efficient data management
- Developed responsive layouts ensuring mobile compatibility

E-Commerce Platform Development

Role: Lead Developer

Built multiple end-to-end e-commerce platforms demonstrating complete online shopping experiences with modern web technologies.

Key Features:

- Product catalog with categories, filters, and search functionality
- Shopping cart with add, remove, and quantity adjustment features
- User registration and authentication system
- Secure checkout process with multiple payment gateway integrations
- Order tracking and history for customers
- Inventory management system for administrators
- Responsive design ensuring seamless experience across all devices
- Product review and rating system

Technologies Used: Django, Python, Bootstrap, JavaScript, PostgreSQL/MySQL, Payment Gateway APIs

Technical Implementation:

- RESTful API architecture for frontend-backend communication
- Secure transaction handling with encrypted data transmission
- Optimized database queries for fast product loading and search
- Session-based cart management with persistent storage

Static Website Development Portfolio

Role: Developer

Designed and developed numerous static websites for various clients and organizations, demonstrating versatility in web design.

Project Types:

- Corporate websites with professional layouts
- Portfolio websites for individuals and businesses
- Landing pages with conversion-focused designs
- Event websites with registration forms
- Informational websites for organizations and institutions

Technologies Used: HTML5, CSS3, JavaScript, Bootstrap, React, jQuery

Design Principles Applied:

- Mobile-first responsive design approach
- Modern UI/UX best practices
- Cross-browser compatibility
- Performance optimization for fast loading times
- SEO-friendly structure and semantic HTML

Smart Shopping Cart with RFID & Mobile App

Role: Team Member

Contributed to an innovative IoT project integrating hardware and software to create a smart shopping experience.

Project Description:

- Developed system using RFID technology for automatic product identification
- Created mobile application for real-time cart monitoring and checkout
- Implemented wireless communication between hardware and mobile app
- Designed user interface for easy navigation and product management
- Integrated payment processing for seamless checkout experience

Technologies Used: RFID Technology, Arduino/Raspberry Pi, React Native, Firebase, Mobile APIs

Technical Skills

Programming Languages & Frameworks

Frontend Development:

- HTML5, CSS3, JavaScript (ES6+)
- Bootstrap framework for responsive design
- Next.js for React-based applications
- jQuery for DOM manipulation
- Responsive web design principles

Backend Development:

- Django (Python web framework)
- PHP for server-side scripting
- RESTful API design and implementation
- Server configuration and deployment

Mobile Application Development:

- React Native for cross-platform development
- Firebase integration (Authentication, Realtime Database, Cloud Storage)
- Mobile UI/UX design principles

Database Management

- MySQL - Relational database design and optimization
- PostgreSQL - Advanced queries and performance tuning
- Firebase - NoSQL real-time database
- Database normalization and schema design
- Query optimization and indexing

Hosting & Deployment

- Digital Ocean - Cloud server management
- Hostinger - Web hosting and domain management
- XAMPP - Local development environment
- Server configuration and maintenance
- Domain management and DNS configuration
- SSL certificate installation and security setup

Design & Multimedia Tools

Graphic Design:

- Adobe Photoshop - Image editing and manipulation
- Canva - Quick design and social media graphics
- Figma - UI/UX design and prototyping

Animation & Video:

- Blender - 3D modeling and animation
- Adobe After Effects - Motion graphics and visual effects

Development Tools

- Git - Version control and collaboration
- GitHub - Repository management and code sharing
- Visual Studio Code - Primary code editor
- Command line interface proficiency
- Debugging and testing tools

Certifications & Training

- **Django Full Stack Developer** - December 2023
 - Comprehensive training in Django framework
 - Full-stack web development with Python
 - Database integration and ORM
- **React Native App Developer** - April 2024
 - Cross-platform mobile application development
 - Firebase integration and real-time features
 - Mobile UI/UX best practices
- **Full-Time Web Developer Experience Certificate** - 7 months
 - Professional web development experience at Zappq
 - Healthcare application development
 - Production-level code and deployment

Professional Affiliations & Societies

- **IEEE (Institute of Electrical and Electronics Engineers)**
 - Active member of IEEE MEA Student Branch
 - Participation in technical events and workshops
 - Access to research publications and industry resources
- **IEDC (Innovation and Entrepreneurship Development Cell)**
 - Member supporting innovation and startup culture
 - Participation in entrepreneurship activities
 - Access to mentorship and funding opportunities
- **TACS (Technical Association of Computer Science)**
 - Head Coordinator (Current)
 - Design Lead (Previous)
 - Active organizer of departmental technical events

Areas of Interest

- Artificial Intelligence and Machine Learning
- Cybersecurity and Information Security
- Web3 and Blockchain Technologies
- Cloud Computing and DevOps
- Internet of Things (IoT)
- Emerging Technology Trends
- Entrepreneurship and Startup Ecosystem

Languages

- English - Fluent (Written and Spoken)
- Malayalam - Native
- Hindi - Conversational
